

COMMON L/R MICROPHONE FLEX – 40mm overall / 3mm neck
J1 is integral FPC copper, not a fitted socket. Mates FH34SRJ band MIC sockets only.
SEL pull and separate CLK series resistors are on the mains; no local straps or DATA pulls.
0.11mm yellow PI flex / 12um Cu per side / ENIG; rear PI reinforcement at tongue and mic.
Keep the bottom acoustic port open through flex, stiffener and adhesive. Do not bend the mic island.
